Explore India with MapmyIndia Navigation Device

By means of a highly innovative driving-guiding-mechanism, introduced by MapmyIndia – the country's leading navigable map data providing company – one can explore now the entire India. The company has declared the installation of an unparalleled car-navigation-device, based on the 'Global Positioning System' (GPS). More than 55,000 towns and villages, 150 cities, 2,00,000 eminent business and tourist spots and the cities like New Delhi, Gurgaon, Noida, Greater Noida, Faridabad, Ghaziabad, Chandigarh, Mohali, Panchkula, Mumbai, Navi Mumbai, Thane, Pune, Kolkata, Hyderabad, Secundrabad, Bangalore and Chennai – will now be under the observation of this unsurpassed car navigating system.

Two different hardware models of the Navigator (the Delphi Nav 200 and the AMAX 06GP5A) are obtainable now in Delhi, Bangalore and Chennai. An in-built GPS system, a 3.5" colour touch screen, a Samsung 400 MHz processor, the

supplementary multimedia features to play movies, music, games, photos and an address book to store the addresses of the favourite destination are the imperative fea-

tures of the device.

It will also inform the travellers about the preeminent locations situated on the course of the journey and around the desti-

nation. If the driver overlooks a road or deliberately opts for a substitute one, the auto re-routing device will immediately start aiding him/her in this respect.

Mr. Rakesh Verma, the MD and the CE of the Info Systems, had commented in this respect – "In countries like India, where roads either don't have names, or road signs are not clearly marked, following directions based on road names or traditional methods can be a frustrating experience. With GPS technology and accurate MapmyIndia maps telling you exactly where to take your next turn, unnamed roads or unclear road signs are no longer an issue."
